

# Advance Notification Protocol

Newfoundland and Labrador Hydro is the primary generator of power and we are heading towards the time of year when demand is at its highest. Our notification system will alert you in advance of a potential shortage of power supply on the island portion of the province.

## NOTIFICATION LEVELS

## WHAT TO DO

**POWER WATCH**

### EXPECTING HIGH POWER USAGE

Electricity system being watched closely.

BE PREPARED

No immediate action required

Be prepared to conserve electricity if asked

**POWER WARNING**

### APPROACHING MAXIMUM DEMAND

Homeowners and businesses will be asked to conserve electricity and be prepared for possible rotating outages.

CONSERVE

Turn your thermostat down

Turn off lights not in use

Reduce your use of hot water and appliances

**POWER EMERGENCY**

### POWER SHORTAGE

Rotating outages may occur.

STAY SAFE

Continue to conserve electricity

Be careful using alternate sources of power and heat

Keep informed
