

Nalcor Energy

VENDOR BULLETIN

As part of our commitment to safety, and to enhance and streamline our contractor data management process, Nalcor Energy and its subsidiaries will be utilizing an online contractor and supplier management platform called ISNetwork.

Any contractor bidding on “high risk” work for Nalcor or its subsidiaries will be required to subscribe to ISNetwork. Further information will be posted and shared as we move closer to implementation. The goal is to complete implementation of ISN by the end of 2021.

The ISNetwork system will:

- ensure companies doing business with us are compliant with our safety and health standards and policies,
- help track contractor safety and health performance, and
- ensure all safety and health regulatory requirements are met.

What are the benefits to you?

Many companies are already registered with ISNetwork. This system provides contractors the ability to manage their safety information within their ISNetwork subscription. The third-party provider of ISNetwork, ISN, will work with contractors to provide information in order to verify and evaluate each contractor based on Nalcor’s criteria.

Through ISNetwork, Nalcor and subsidiaries will be able to maintain a list of contractors that meet all the required safety and health criteria. Implementing this new process will provide a more effective, efficient and timely contractor selection and procurement process, while also helping meet regulatory compliance and safety qualification requirements.

Is there a cost?

If your company is new to ISNetwork, there is a fee to subscribe and additional information can be provided by ISN. If you already subscribe, there is no additional fee, however contractors must review all the criteria required by Nalcor and subsidiaries to ensure they meet the requirements.

TO REGISTER:

Visit www.isnetwork.com and select SIGN UP

The process will take time to complete, so we encourage to start yours today.

FOR ASSISTANCE:

For more details about ISNetwork, contact ISN Customer Service at (800) 976-1303 or visit www.isn.com.
