

# Schedule of Rates, Rules and Regulations

Newfoundland and Labrador Hydro

Updated January 1, 2025

**TABLE OF CONTENTS**

**UTILITY**

Newfoundland Power..... UT-1

**INDUSTRIAL**

Island Industrial Firm..... IND-1  
Island Industrial Non-Firm ..... IND-3  
Island Industrial Wheeling ..... IND-4

**RATE STABILIZATION PLAN RULES FOR BALANCE DISPOSITION**

Section A ..... RSP-1  
Section B ..... RSP-2  
Section C ..... RSP-3

**CONSERVATION DEMAND MANAGEMENT**

Conservation and Demand Management Cost Recovery ..... CDM-1

**RULES AND REGULATIONS**

1. Interpretation ..... RR-1  
2. Classes of Service..... RR-3  
3. Application for Service..... RR-4  
4. Security for Payment ..... RR-5  
5. Service Standards - Metered Services ..... RR-5  
6. Service Standards - Street and Area Lighting Service..... RR-7  
7. Metering ..... RR-7  
8. Meter Reading ..... RR-9  
9. Charges ..... RR-10  
10. Billing ..... RR-12  
11. Discontinuance of Service..... RR-13  
12. Disconnection of Service ..... RR-13  
13. Property Rights ..... RR-14  
14. Hydro Liability ..... RR-15  
15. General ..... RR-15  
16. Policies for Automatic Rate Changes..... RR-15  
17. Temporary Restriction for Load Additions to Labrador East..... RR-16

**ISLAND INTERCONNECTED AND L'ANSE AU LOUP AREAS**

1.1 Domestic..... ISL-1  
1.1S Domestic - Optional..... ISL-2  
1.3 Burgeo School and Library..... ISL-3  
2.1 General Service 0–100 kW (110 kVA)..... ISL-4  
2.3 General Service 110 kVA (100 kW)–1,000 kVA..... ISL-5  
2.4 General Service 1,000 kVA and over ..... ISL-6  
4.1 Street and Area Lighting Service..... ISL-7

**ISLAND AND LABRADOR DIESEL AREA – NON-GOVERNMENT**

1.2D Domestic Diesel .....	DSL-NG-1
1.2DS Domestic Diesel (Non-Government First Block) – Optional .....	DSL-NG-2
2.1D General Service Diesel 0–10 kW .....	DSL-NG-3
2.2D General Service Diesel Over 10 kW .....	DSL-NG-4
4.1D Street and Area Lighting Service Diesel .....	DSL-NG-5

**ISLAND AND LABRADOR DIESEL AREA – GOVERNMENT**

1.2G Domestic Diesel .....	DSL-G-1
2.1G General Service Diesel 0–10 kW .....	DSL-G-2
2.2G General Service Diesel Over 10 kW .....	DSL-G-3
4.1G Street and Area Lighting Service Diesel .....	DSL-G-4

**LABRADOR INTERCONNECTED AREA**

1.1L Domestic .....	LAB-1
2.1L General Service 0–10 kW .....	LAB-2
2.2L General Service 10–100 kW (110 kVA) .....	LAB-3
2.3L General Service 110 kVA (100 kW)–1,000 kVA .....	LAB-4
2.4L General Service 1,000 kVA and over .....	LAB-5
4.1L Street and Area Lighting Service .....	LAB-6
4.11L Street and Area Lighting Service .....	LAB-7
4.12L Street and Area Lighting Service .....	LAB-8
5.1L Non-Firm Energy .....	LAB-9

**LABRADOR INDUSTRIAL**

Labrador Industrial .....	LAB-IND-1
---------------------------	-----------

**COMMISSIONING POWER**

Commissioning Power Non-Firm Rate .....	CP-1
---	------

**NET METERING SERVICE OPTION**

Net Metering Service Option .....	NM-1
-----------------------------------	------

## UTILITY

### Availability

This rate is applicable to service to Newfoundland Power ("NP").

### Definitions

"Billing Demand"

The Curtailable Credit shall apply to determine the billing demand as an adjustment to the highest Native Load established during the winter period. The computation of the adjustment to reflect the Curtailable Credit is provided in the definitions below.

In the months of January through March, billing demand shall be the greater of:

- a) The highest Native Load less the Generation Credit and the Curtailable Credit, beginning in the previous December and ending in the current month; and
- b) The Minimum Billing Demand.

In the months of April through December, billing demand shall be the greater of:

- a) The Weather-Adjusted Native Load less the Generation Credit and the Curtailable Credit, plus the Weather Adjustment True-up; and
- b) The Minimum Billing Demand.

If at the time of establishing its Maximum Native Load, NP has been requested by Hydro to reduce its Native Load by shedding curtailable load, the calculation of Billing Demand for each month shall not deduct the Curtailable Credit.

"Generation Credit" refers to NP's net generation capacity less allowance for system reserve, as follows:

	<b>kW</b>
Hydraulic Generation Credit	83,486
Thermal Generation Credit	34,568
<b>Newfoundland Power Generation Credit</b>	<b>118,054</b>

In order to continue to avail of the Generation Credit, NP must demonstrate the capability to operate its generation to the level of the Generation Credit. This will be verified in a test by operating the generation at a minimum of this level for a period of one hour as measured by the generation demand metering used to determine the Native Load. The test will be carried out at a mutually agreed time between December 1 and March 31 each year. If the level is not sustained, NP will be provided with an opportunity to repeat the test at another mutually agreed time during the same December 1 to March 31 period. If the level is not sustained in the second test, the Generation Credit will be reduced in calculating the associated billing demands for January to December to the highest level that could be sustained.

"Curtailable Credit" is determined based upon NP's forecast curtailable load available for the period in

accordance with the terms and conditions set forth in NP's Curtailable Service Option. NP will notify Hydro of its available curtailable load with its forecast of annual and monthly electricity requirements.

In order to receive the Curtailable Credit, NP must demonstrate the capability to curtail its customer load requirements to the level of the Curtailable Credit. This will be verified in a test by curtailing load at a minimum of this level for a period of one hour. The test will be carried out at a mutually agreed time in December. If the level is not sustained, the Curtailable Credit will be reduced to the level sustained. If Hydro requests NP to curtail load before a test is completed and NP demonstrates the capability to curtail to the level of the Curtailment Credit, no test will be required.

NP will be required to provide a report to Hydro no later than April 15 to demonstrate the amount of load curtailed for each request of Hydro during the previous winter season. If the load curtailed is less than forecast for either request during the winter season, the annual Curtailable Credit will be adjusted to reflect the average load curtailed for the winter season. If NP is not requested to curtail during the winter season, the Curtailment Credit will be established based upon the lesser of the load reduction achieved in the test or the forecast curtailable load (as provided in the previous two paragraphs).

"Maximum Native Load" means the maximum Native Load of NP in the four-month period beginning in December of the preceding year and ending in March of the current year.

"Minimum Billing Demand" means ninety-nine percent (99%) of:

NP's test year Native Load less the Generation Credit and the Curtailable Credit.

The Curtailable Credit reflected in the Minimum Billing Demand will be set to equal the curtailable load used to determine the Maximum Native Load for NP for the most recently approved Test Year.

"Month" means for billing purposes, the period commencing at 12:01 hours on the last day of the previous month and ending at 12:00 hours on the last day of the month for which the bill applies.

“Native Load” is the sum of:

- a)** The amount of electrical power, delivered at any time and measured in kilowatts, supplied by Hydro to NP, averaged over each consecutive period of fifteen minutes duration, commencing on the hour and ending each fifteen-minute period thereafter;
- b)** The total generation by NP averaged over the same fifteen-minute periods.

“Weather-Adjusted Native Load” means the Maximum Native Load adjusted to normal weather conditions, calculated as:

Maximum Native Load  
plus (Weather Adjustment, rounded to 3 decimal places, x 1,000)

Weather Adjustment is further described and defined in the Weather Adjustment section.

“Weather Adjustment True-up” means one-ninth of the difference between:

- a)** The greater of:
  - The Weather Adjusted Native Load less the Generation Credit and the Curtailable Credit (if applicable), times three; and
  - The Minimum Billing Demand, times three; and
- b)** The sum of the actual billed demands in the Months of January, February and March of the current year.

**Monthly Rates**

**Billing Demand Charge**

Billing Demand, as set out in the Definitions section, shall be charged at the following rate:

Demand Charge.....\$5.00 per kW of Billing Demand

**Energy Charge**

**January– March**

First 590,000,000 kilowatt-hours\* .....@ 8.515¢ per kWh

All excess kilowatt-hours\* .....@ 9.698¢ per kWh

**April–June**

First 290,000,000 kilowatt-hours\* .....@ 8.515¢ per kWh

All excess kilowatt-hours\* .....@ 3.354¢ per kWh

**July–September**

First 130,000,000 kilowatt-hours\* .....@ 8.515¢ per kWh

All excess kilowatt-hours\* .....@ 3.354¢ per kWh

**October–November**

First 250,000,000 kilowatt-hours\* .....@ 8.515¢ per kWh

All excess kilowatt-hours\* .....@ 3.354¢ per kWh

**December**

First 250,000,000 kilowatt-hours\* .....@ 8.515¢ per kWh

All excess kilowatt-hours\* .....@ 9.698¢ per kWh

**Firming-Up Charge**

Secondary energy supplied by

Corner Brook Pulp and Paper Limited\* .....@ 2.882¢ per kWh

**RSP Adjustment - Current Plan**.....@ 0.461¢ per kWh

**Project Cost Recovery Rider**.....@ 1.124¢ per kWh

**CDM Cost Recovery Adjustment**.....@ 0.017¢ per kWh

**\*Subject to RSP Adjustment, CDM Cost Recovery Adjustment, and Project Cost Recovery Rider**

**Adjustment for Losses**

If the metering point is on the load side of the transformer, either owned by the customer or specifically assigned to the customer, an adjustment for losses as determined in consultation with the customer prior to January 31 of each year shall be applied to metered demand and energy.

### **Adjustment for Station Services and Step-Up Transformer Losses**

If the metering point is not on the generator output terminals of NP's generators, an adjustment for Newfoundland Power's power consumption between the generator output terminals and the metering point as determined in consultation with the customer prior to the implementation of the metering shall be applied to the metered demand.

### **Weather Adjustment**

This section outlines procedures and calculations related to the weather adjustment applied to NP's Maximum Native Load.

- a) Weather adjustment shall be undertaken for use in determining NP's Billing Demand.
- b) Weather adjustment shall be derived from Hydro's NP native peak demand model.
- c) By September 30th of each year, Hydro shall provide NP with an updated weather adjustment coefficient incorporating the latest year of actuals.
- d) The underlying temperature and wind speed data utilized to derive weather adjustment shall be sourced to weather station data for the St. John's, Gander, and Stephenville airports reported by Environment Canada. NP's regional energy sales shall be used to weigh regional weather data. Hydro shall consult with NP to resolve any circumstances arising from the availability of, or revisions to, weather data from Environment Canada and/or wind chill formulation.
- e) The primary definition for the temperature weather variable is the average temperature for the peak demand hour and the preceding seven hours. The primary definition for the wind weather data is the average wind speed for the peak demand hour and the preceding seven hours. Hydro will consult with NP should data anomalies indicate a departure from the primary definition of underlying weather data.
- f) Subject to the availability of weather data from Environment Canada, Hydro shall prepare a preliminary estimate of the Weather-Adjusted Native Load by March 15th of each year, and a final calculation of the Weather-Adjusted Native Load by April 5th of each year.

### **General**

**This rate schedule does not include the Harmonized Sales Tax (HST) that applies to electricity bills.**

With respect to all matters where the customer and Hydro consult on resolution but are unable to reach a mutual agreement, the billing will be based on Hydro's best estimate.

**INDUSTRIAL – FIRM**

**Availability**

Any person purchasing power, other than a retailer, supplied from the Interconnected Island bulk transmission grid at voltages of 66 kV or greater on the primary side of any transformation equipment directly supplying the person and who has entered into a contract with Hydro for the purchase of firm power and energy.

**Base Rate\***

**Demand Charge**

The rate for Firm Power, as defined and set out in the Industrial Service Agreements, shall be \$10.73 per kilowatt (kW) per month of billing demand.

**Firm Energy Charge**

Base Rate.....	@ 4.428¢ per kWh
<b>RSP Adjustment - Current Plan .....</b>	<b>@ 0.093¢ per kWh</b>
<b>Project Cost Recovery Rider.....</b>	<b>@ 1.384¢ per kWh</b>
<b>CDM Cost Recovery Adjustment.....</b>	<b>@ 0.006¢ per kWh</b>

### **Specifically Assigned Charges**

The table below contains the additional annual specifically assigned charges for customer plant in service that is specifically assigned to the Customer.

	<b>Annual Amount</b>
Corner Brook Pulp and Paper Limited	\$13,311
Braya Renewable Fuels (Newfoundland) GP Inc.	\$107,678
Teck Resources Limited	\$51,789
Vale	\$145,352

### **\*Subject to RSP Adjustments and CDM Cost Recovery Adjustment**

RSP Adjustments refers to all applicable adjustments arising from the operation of Hydro’s Rate Stabilization Plan, which levelizes variations in hydraulic production, fuel cost, load and rural rates.

The CDM Cost Recovery Adjustment is updated annually to provide recovery over a ten-year period of costs charged annually to the Conservation and Demand Management (CDM) Cost Deferral Account.

### **Adjustment for Losses**

If the metering point is on the load side of the transformer, either owned by the customer or specifically assigned to the customer, an adjustment for losses as determined in consultation with the customer prior to January 31 of each year shall be applied.

### **General**

Details regarding the conditions of Service are outlined in the Industrial Service Agreements.

**This rate schedule does not include the Harmonized Sales Tax (HST) that applies to electricity bills.**

## **INDUSTRIAL – NON-FIRM**

### **Availability**

Any person purchasing power, other than a retailer, supplied from the Interconnected Island bulk transmission grid at voltages of 66 kV or greater on the primary side of any transformation equipment directly supplying the person and who has entered into a contract with Hydro for the purchase of firm power and energy.

### **Rate**

#### **Non-Firm Energy Charge: Non-Thermal Generation Source (¢ per kWh)**

Hydro will inform the Customer of the Non-firm energy charge on the first business day following the 21st day of the month preceding the month for which the rate is being set.[]

Energy charges shall be the greater of:

- (i) The energy charge applicable to Rate No. 2.4L – General Service 1,000 KVA and Over provided in Hydro’s Schedule of Rates, Rules and Regulations; and
- (ii) The applicable On-Peak Energy Rate or Off-Peak Energy Rate

The following formula shall apply to calculate the On-Peak Energy Rate and Off-Peak Energy Rate:

#### **On-Peak Energy Rate:**

The non-firm energy charge for the on-peak period for the calendar month shall be calculated monthly based on the weighted average of:

- (iii) the settlement price for NYISO Zone A Day-Ahead Peak Calendar-Month 5 MW Futures after the end of trading on the nineteenth day of the previous month, converted to Canadian dollars using the exchange rate of the same day, and adjusted for losses and other market fees; and
- (iv) the settlement price for ISO New England Mass Hub 5 MW Peak Calendar-Month Day-Ahead LMP Futures after the end of trading on the nineteenth day of the previous month, converted to Canadian dollars using the exchange rate of the same day, and adjusted for losses and other market fees.

#### **Off-Peak Energy Rate**

The non-firm energy charge for the off-peak period for the calendar month shall be calculated monthly based on the weighted average of:

- (v) the settlement price for NYISO Zone A Day-Ahead Off-Peak Calendar-Month 5 MW Futures after the end of trading on the nineteenth day of the previous month, converted to Canadian dollars using the exchange rate of the same day, and adjusted for losses and other market fees; and

- (vi) the settlement price for ISO New England Mass Hub Day-Ahead Off-Peak Calendar-Month 5 MW Futures after the end of trading on the nineteenth day of the previous month, converted to Canadian dollars using the exchange rate of the same day, and adjusted for losses and other market fees.

The weightings applied to each market price to calculate the on-peak and off-peak energy charges will reflect the percentage of kWh exports sold (i.e., including exports from regulated and non-regulated Hydro) based on each market for the previous calendar month.

### **Peak and Off-Peak Periods**

The winter on-peak period is 7 am to 10 pm, Monday to Friday, for the months of December to March and the non-winter peak period is 8 am to 10 pm, Monday to Friday, for the period April to November. The off-peak period will include all other hours.

### **Non-Firm Energy Charge: Thermal Generation Source (¢ per kWh)**

The following formula shall apply to calculate the Non-Firm Energy rate:

$$\{(A \div B) \times (1 \div (1 - C))\} \times 100$$

- A = the monthly average cost of fuel per barrel for the energy source in the current month or, in the month the source was last used
- B = the conversion factor for the source used (kWh/bbl)
- C = the average system losses on the Island Interconnected grid for the last five years ending in 2016 (3.34%).

The energy sources and associated conversion factors are:

- 1) Holyrood, using No. 6 fuel with a conversion factor of 583 kWh/bbl
- 2) Gas turbines using No. 2 fuel with a conversion factor of 475 kWh/bbl
- 3) Diesels using No. 2 fuel with a conversion factor of 556 kWh/bbl

### **Adjustment for Losses for Thermal Generation Source**

If the metering point is on the load side of the transformer, either owned by the customer or specifically assigned to the customer, an adjustment for losses as determined in consultation with the customer prior to January 31 of each year shall be applied.

### **General**

Details regarding the conditions of Service are outlined in the Industrial Service Agreements.

**This rate schedule does not include the Harmonized Sales Tax (HST) that applies to electricity bills.**

**INDUSTRIAL – WHEELING**

**Availability**

Any person purchasing power, other than a retailer, supplied from the Interconnected Island bulk transmission grid at voltages of 66 kV or greater on the primary side of any transformation equipment directly supplying the person and who has entered into a contract with Hydro for the purchase of firm power and energy and whose Industrial Service Agreement so provides.

**Rate**

**Energy Charge**

All kWh (net of losses)\* ..... @ 0.831¢ per kWh

\*For the purpose of this Rate, losses shall be 3.34%, the average system losses on the Island Interconnected Grid for the last five years ending in 2016.

**General**

Details regarding the conditions of Service are outlined in the Industrial Service Agreements.

**This rate schedule does not include the Harmonized Sales Tax (HST) that applies to electricity bills.**

## **RATE STABILIZATION PLAN RULES FOR BALANCE DISPOSITION**

The Rate Stabilization Plan (“RSP”) of Newfoundland and Labrador Hydro (“Hydro”) was established for Hydro’s Utility customer, Newfoundland Power Inc. (“Newfoundland Power”), and Island Industrial customers to smooth rate impacts for variations between actual results and test year cost of service estimates for:

- Hydraulic production;
- No. 6 fuel cost used at Hydro’s Holyrood Thermal Generating Station;
- Customer load (Utility and Island Industrial); and
- Rural rates.

In Board Order No. P.U. 33(2021), the Board of Commissioners of Public Utilities (“Board”) approved the Supply Cost Variance Deferral Account to deal with future supply cost variances on the Island Interconnected System beginning in the month in which Hydro was required to begin payments under the Muskrat Falls Purchase Power Agreement (i.e., November 2021). The approval of the Supply Cost Variance Deferral Account discontinued transfers to the RSP, effective as of the implementation of the Supply Cost Variance Deferral Account, resulting from variations in future costs associated with the test year cost of service estimates for the items listed above. However, the Board directed that the RSP balances be maintained for the transparent and timely recovery of historical balances. The following rules provide for the disposition of historical balances in accordance with the RSP Rules previously approved by the Board.

### **Section A: Hydraulic Production Variation Balance Disposition**

#### **1. Financing**

Each month, financing charges, using Hydro's approved test year weighted average cost of capital, will be calculated on the balance.

#### **2. Hydraulic Variation Customer Assignment**

Customer assignment of hydraulic variations will be performed annually as follows:

$$(E \times 25\%) + F$$

Where:

E = Hydraulic Variation Account Balance as of October 31, 2021, excluding financing charges; and

F = Financing charges accumulated to December 31 for each year.

The total amount of the Hydraulic Customer Assignment shall be removed from the Hydraulic Variation Account.

#### **3. Customer Allocation**

The annual customer assignment will be allocated among the Island Interconnected customer groups of (i) Newfoundland Power, (ii) Island Industrial Firm, and (iii) Rural Island Interconnected. The allocation will be based on percentages derived from 12 months-to-date kWh up to October 31,

2021 for Utility Firm and Firmed-Up Secondary invoiced energy, Industrial Firm invoiced energy, and Rural Island Interconnected bulk transmission energy.

The portion of the hydraulic customer assignment, which is initially allocated to Rural Island Interconnected, will be re-allocated between Newfoundland Power and regulated Labrador Interconnected customers in the same proportion to which the Rural Deficit was allocated in the approved test year cost of service study.

The Newfoundland Power and Island Industrial customer allocations shall be included with the Newfoundland Power and Island Industrial RSP balances, respectively, as of December 31 each year. The Labrador Interconnected Hydraulic customer allocation shall be written off to Hydro's net income (loss).

## **Section B: Fuel Cost Variation, Load Variation and Rural Rate Alteration**

### **1. Customer Allocation: Load and Fuel Activity Historical Balance**

The year-to-date total for fuel price variation as of October 31, 2021 and the year-to-date total for the load variation as of October 31, 2021 will be allocated among the Island Interconnected customer groups of (i) Newfoundland Power, (ii) Island Industrial Firm, and (iii) Rural Island Interconnected. The allocation will be based on percentages derived from 12 months-to-date kWh as of October 31, 2021 for Utility Firm and Firmed-Up Secondary invoiced energy, Industrial Firm invoiced energy, and Rural Island Interconnected bulk transmission energy.

The year-to-date portion of the fuel price variation as of October 31, 2021 and the year-to-date portion of the load variation as of October 31, 2021, which is initially allocated to Rural Island Interconnected, will be re-allocated between Newfoundland Power and regulated Labrador Interconnected customers in the same proportion which the Rural Deficit was allocated in the approved test year cost of service study.

The amount allocated to regulated Labrador Interconnected customers will be removed from the plan and written off to Hydro's net income (loss).

### **2. Customer Allocation: Rural Rate Alteration Activity Historical Balance**

The rural rate alteration as of October 31, 2021 will be allocated between Newfoundland Power and regulated Labrador Interconnected customers in the same proportion to which the Rural Deficit was allocated in the approved test year cost of service study. The portion allocated to regulated Labrador Interconnected will be removed from the plan and written off to Hydro's net income (loss).

### **3. Plan Balances**

Separate plan balances for Newfoundland Power and the Island Industrial customer class will be maintained. The RSP balances shall be adjusted by other amounts as ordered by the Board. Financing charges on the plan balances will be calculated monthly using Hydro's approved test year weighted average cost of capital.

**Section C: Adjustment**

**1. Newfoundland Power**

As of March 31 each year, Newfoundland Power's adjustment rate for the 12-month period commencing the following July 1 is determined as the rate per kWh that is projected to collect:

Newfoundland Power March 31 Balance

less            projected recovery/repayment of the balance for the following three months (if any), estimated using the energy sales (kWh) for April, May and June from the previous year;

plus            forecast financing charges to the end of the 12-month recovery period (i.e., June in the following calendar year);

divided by    the 12-months-to-date firm plus firmed-up secondary kWh sales to the end of March.

**2. Island Industrial Customers**

As of December 31 each year, the adjustment rate for Island Industrial customers for the 12-month period commencing January 1 is determined as the rate per kWh that is projected to collect:

Industrial December 31 Balance

plus            forecast financing charges to the end of the following calendar year;

divided by    the 12-months-to-date kWh sales to the end of December.

## **CONSERVATION AND DEMAND MANAGEMENT COST RECOVERY**

The CDM Cost Recovery Adjustment, expressed in cents per kWh, will be calculated to provide for the recovery of costs charged annually to the Conservation and Demand Management Cost Deferral Account (the “CDM Cost Deferral Account”) over a ten-year period.

The CDM Cost Recovery Adjustment will be calculated to recover the sum of individual amounts representing 1/10th of the transfer to the CDM Deferral Account for the previous year and the amortizations carried forward from prior years will be adjusted to reflect the recovery over a ten-year period.

There will be different CDM Cost Recovery Adjustments for Island Industrial Customers and Newfoundland Power. The CDM Cost Recovery Adjustment for Island Industrial Customers will be calculated based upon the Island Interconnected Recoverable Amount allocated for recovery from Island Industrial Customers. The CDM Cost Recovery Adjustment for Newfoundland Power will be calculated based upon the allocated Island Interconnected Recoverable Amount to Newfoundland Power (including the allocated Island Interconnected Hydro Rural Amount) plus the allocated Hydro Rural Isolated System amount to Newfoundland Power.

### **Assignment of Customer Balance for Recovery**

The Island Interconnected Recoverable Amount will be allocated among the Island Interconnected customer groups of (1) Newfoundland Power; (2) Island Industrial Firm; and (3) Rural Island Interconnected. The allocation will be based on percentages of previous calendar year sales for Utility Firm and Firmed-Up Secondary invoiced energy, Industrial Firm invoiced energy, and Rural Island Interconnected bulk transmission energy.

The portion of the Island Interconnected Recoverable Amount, which is initially allocated to Rural Island Interconnected, will be added to the Hydro Rural Isolated System Recoverable Amount, and then re-allocated between Newfoundland Power and regulated Labrador Interconnected customers in the same proportion which the Rural Deficit was allocated in the approved Test Year Cost of Service Study.

The portion of the Recoverable Amount which is re-allocated to Labrador Interconnected customers shall be charged to the CDM Cost Deferral Account for future recovery from customers on the Labrador Interconnected System.

## **CDM Cost Recovery Adjustment**

### **Newfoundland Power**

The adjustment rate for each year will be determined as follows:

$$B = (C \div D)$$

Where:

- B = adjustment rate (¢ per kWh) for the 12-month period commencing the following July.
- C = Recoverable Amount assigned to Newfoundland Power from the previous calendar year.
- D = energy sales (kWh) (firm and firm-up secondary) to Newfoundland Power for the previous calendar year.

### **Island Industrial Customers**

The adjustment rate for each year will be determined as follows:

$$E = (F \div H)$$

Where:

- E = adjustment rate (¢ per kWh) for the 12-month period commencing the following July.
- F = Recoverable Amount assigned to Industrial Customers from the previous calendar year.
- H = firm energy sales (kWh) to Industrial Customers for the previous calendar year.

## RULES AND REGULATIONS

### APPLICABILITY:

These general Rules and Regulations apply to all Hydro Rural Customers.

### 1. INTERPRETATION

(a) In these Rates and Rules the following definitions shall apply:

- (i) **"Act"** means the *Public Utilities Act*, RSNL 1990, c.P-47 as amended from time to time.
- (ii) **"Annual Review Billing Month"** represents the billing month in which the utility provides payment for the Banked Energy Credits.
- (iii) **"Annual Review Date"** means the date that marks a Customer-Generator's annual participation in the Net Metering Service Option. The Annual Review Date occurs during the Annual Review Billing Month.
- (iv) **"Applicant"** means any person who applies for Service.
- (v) **"Banked Energy Credits"** represent the amount of kilowatt-hour ("kWh") energy supplied by the customer to the utility that is in excess of the kWh energy supplied by the utility to the customer. Banked Energy Credits will be reduced to zero whenever the customer generator receives payment for the outstanding balance.
- (vi) **"Board"** means the Board of Commissioners of Public Utilities of Newfoundland and Labrador.
- (vii) **"Customer"** means any person who accepts or agrees to accept Service.
- (viii) **"Customer-Generator"** is a utility customer that has renewable generation on its serviced premise and uses this generation to offset part or all of their electrical energy requirements. Customers with standby generation that does not normally operate while connected to the utility system are not included as Customer-Generators.
- (ix) **"Customer Generation Credit"** represents a monetary credit to the Customer-Generator for energy supplied by the customer to the utility.
- (x) **"Disconnected"** or **"Disconnect"** in reference to a Service means the physical interruption of the supply of electricity thereto.
- (xi) **"Discontinued"** or **"Discontinue"** in reference to a Service means to terminate the Customer's on-going responsibility with respect to the Service.

- (xii) **"Domestic Unit"** means a house, apartment or other similar residential unit which is normally occupied by one family, or by a family and no more than four other persons who are not members of that family, or which is normally occupied by no more than six unrelated persons.
- (xiii) **"Generation Energy Credit"** equals the kWh energy supplied by the customer to the utility during the billing month plus any Banked Energy Credits. However, the Generation Energy Credit applied in the current month cannot exceed the energy supplied by the utility to the customer during the billing month.
- (xiv) **"Government Departments"** means electric service accounts of Provincial or Federal government departments, agencies, boards, commissions, and crown corporations but excludes hospitals, fish plants, churches, schools, community halls, municipal buildings and like facilities.
- (xv) **"Hydro"** means Newfoundland and Labrador Hydro.
- (xvi) **"Hydro Rural customers"** means regulated customers served by Hydro other than industrial customers and Newfoundland Power.
- (xvii) **"Net Metering Service"** is a metering and billing practice that enables Customer-Generators of renewable energy to offset part or all of their electricity requirements by utilizing their own generation. Electricity generated in excess of the customer's energy requirements is permitted to be credited against customer energy purchases within certain limitations.
- (xviii) **"Service"** means any service(s) provided by Hydro pursuant to these Regulations.
- (xix) **"Serviced premises"** means the premises at which Service is delivered to the Customer.
- (xx) **"Sizing Limits"** represent the maximum capacity for qualifying generating equipment for each Customer-Generator.
- (xxi) **"Utility Supply Cost"** represents the total of the: basic customer charge, energy charges and demand charge, where applicable, for energy supplied to the customer during the billing month.

(b) Unless the context requires otherwise these Rates and Rules shall be interpreted such that:

(i) Words imparting male persons include female persons and corporations.

Words imparting the singular include the plural and vice versa.

## 2. CLASSES OF SERVICE

(a) Hydro shall provide the following classes of Service:

### **ISLAND INTERCONNECTED AREA/LANSE AU LOUP AREA**

- 1.1 Domestic
- 1.1S Domestic Seasonal
- 1.3 Burgeo School and Library
- 2.1 General Service, 0–100 kW
- 2.3 General Service, 110 kVA (100 kW)–1,000 kVA
- 2.4 General Service, 1,000 kVA and Over
- 4.1 Street and Area Lighting Service

### **ISLAND AND LABRADOR DIESEL AREA**

- 1.2D Domestic Diesel – Non-Government
- 1.2DS Domestic Seasonal Diesel – Non-Government
- 2.1D General Service Diesel – Non-Government, 0–10 kW
- 2.2D General Service Diesel – Non-Government, 10 kW and Over
- 4.1D Street and Area Lighting Service Diesel – Non-Government
- 1.2G Domestic Diesel - Government Departments
- 2.1G General Service Diesel – Government Departments, 0–10 kW
- 2.2G General Service Diesel – Government Departments, 10 kW and Over
- 4.1G Street and Area Lighting Service Diesel – Government Departments

**LABRADOR INTERCONNECTED AREA**

- 1.1L Domestic
- 2.1L General Service, 0–10 kW
- 2.2L General Service, 10–100 kW (110 kVA)
- 2.3L General Service, 110 kVA (100 kW)–1,000 kVA
- 2.4L General Service, 1,000 kVA and Over
- 4.1L Street and Area Lighting Service
- 4.11L Street and Area Lighting Service Labrador – Installed as of Sept. 1, 2002
- 4.12L Street and Area Lighting Service Labrador– Customer Owned
- 5.1L Non-Firm Energy

- (b) The terms and conditions relating to each class of Service shall be those approved by the Board from time to time.
- (c) Service, other than Street and Area Lighting Service, shall be metered except where the energy consumption is relatively low and constant and in the opinion of Hydro can be readily determined without metering.
- (d) The Customer shall use the Service on the Serviced Premises only. The Customer shall not resell the Service in whole or in part except that the Customer may include the cost of Service in charges for the lease of space or as part of the cost of other services provided by the Customer.

**3. APPLICATION FOR SERVICE**

- (a) An Applicant, when required by Hydro, shall complete a written Electrical Service Contract.
- (b) An application for Service, when accepted by Hydro, constitutes a binding contract between the Applicant and Hydro which cannot be assigned.
- (c) The person who signs an application for Service shall be personally liable for Service provided pursuant thereto, unless that person has authority to act for another Person denoted as the Applicant on the application for Service.
- (d) Hydro may in its discretion refuse to provide Service to an Applicant where:
  - (i) The Applicant fails or refuses to complete an application for Service.
  - (ii) The Applicant provides false or misleading information on the application for Service.
  - (iii) The Applicant or the Owner or an Occupant of the Serviced Premises has a bill for any Service which is not paid in full 30 days or more after issuance.

- (iv) The Applicant fails to provide the security or guarantee required under Regulation 4.
  - (v) The Applicant is not the owner or an occupant of the Serviced Premises.
  - (vi) The Service requested is already supplied to the Serviced Premises for another Customer who does not consent to having his Service Discontinued.
  - (vii) The Applicant does not pay a charge described in Regulation 9 (b), (c), or (d).
  - (viii) The Applicant otherwise fails to comply with these Regulations.
- (e) A Customer who has not completed an application for Service shall do so within 5 days of a request having been made by Hydro in writing.

#### **4. SECURITY FOR PAYMENT**

- (a) An Applicant or a Customer shall give such reasonable security for the payment of charges as may be required by Hydro. When the Customer has established two consecutive years of good credit history, the security deposit will be refunded with simple interest calculated at a Rate equivalent to the Rate paid from time to time by the chartered banks on over-the-counter withdrawal savings accounts.
- (b) Hydro may in its discretion require special guarantees from an Applicant or Customer whose location or load characteristics would require abnormal investment in facilities or who requires Service of a special nature.

#### **5. SERVICE STANDARDS - METERED SERVICES**

- (a) Service shall normally be provided at one of the following nominal standard secondary voltages depending upon the requirements of the load to be served and the availability of a three phase supply:

Single phase, 3-Wire	-	120/240 volts
Three phase, 4-Wire	-	120/208 volts wye
Three phase, 4-Wire	-	347/600 volts wye

Service at any other supply voltage may be provided in special cases at the discretion of Hydro.

- (b) Service to customers who are provided Domestic Service shall be supplied at single phase 120/240 volt or as part of a multiunit building, at single phase 120/208 volts. Hydro may if requested by the customer, provide three phase service if a contribution in aid of construction is paid to Hydro in accordance with regulation 9(c).

- (c) Hydro shall determine the point at which power and energy is delivered from Hydro's facilities to the Customer's electrical system.
- (d) Service entrances shall be in a location satisfactory to Hydro and, except as otherwise approved by Hydro, shall be wired for outdoor meters.
- (e) Where Hydro has reason to believe that Service to a Customer has or will have load characteristics which may cause undue interference with Service to another Customer, the Customer shall upon written notice by Hydro provide and install, at his expense and within a reasonable period of time, the equipment necessary to eliminate or prevent such interference.
- (f) (i) Any Customer having a connected load or a normal operating demand of more than 25 kilowatts, in areas where space limitations or aesthetic reasons make it impractical to use a pole mounted transformer bank, shall, on request of Hydro, install and maintain a padmount transformer and all associated underground wiring, or provide at his expense a suitable vault or enclosure on the Serviced Premises for exclusive use by Hydro for its equipment necessary to supply and maintain service to the Customer.

(ii) Where either the service requirements of a Customer or changes to a Customer's electrical system necessitate the installation of additional equipment to Hydro's system which cannot be accommodated in Hydro's existing vaults or structures, the Customer shall, on request of Hydro, provide at the Customer's expense such additional space in its vault or enclosure as Hydro shall require to accommodate the additional equipment.
- (g) The Customer shall not use a Service for across the line starting of motors rated over 10 horsepower except where specifically approved by Hydro.
- (h) For Services having rates based on kilowatt demand, the average power factor shall not be less than 90%. Hydro, in its discretion, may make continuous tests of power factor or may test the Customer's power factor from time to time. If the Customer's power factor is lower than 90%, the Customer shall upon written notice by Hydro provide, at his expense, power factor corrective equipment to ensure that a power factor of not less than 90% is maintained.
- (i) Hydro shall provide transformation for Service up to 500 kVA where the required service voltage is one of Hydro's standard service voltages and installation is in accordance with Hydro's standards. In other circumstances, Hydro, on such conditions as it deems acceptable, may provide the transformation.
- (j) All Customer wiring and installations shall be in compliance with all statutory and regulatory requirements including the Canadian Electrical Code, Part 1 and, where applicable, in accordance with Hydro's specifications. However, the provision of Service shall not in any way be construed as acceptance by Hydro of the Customer's electrical system.

- (k) The Customer shall provide such protective devices as may be necessary to protect his property and equipment from any disturbance beyond the reasonable control of Hydro.

## **6. SERVICE STANDARDS - STREET AND AREA LIGHTING SERVICE**

- (a) For Street and Area Lighting Service Hydro shall use its best efforts to provide illumination during the hours of darkness for a total of approximately 4200 hours per year. Hydro shall, subject to Regulation 9 (i) make all repairs necessary to maintain service.
- (b) Hydro shall supply the energy required and shall provide and maintain the illuminating fixtures and lamps together with necessary overhead conductors, control equipment and other devices.
- (c) Hydro shall not be required to provide Street and Area Lighting Service where, in the opinion of Hydro, the normal Service is unsuitable for the task or where the nature of the activities carried out in the area would likely result in damage to the poles, wiring or fixtures.
- (d) Hydro shall provide a range of fixture sizes utilizing an efficient lighting source in accordance with current standards in the industry and shall consult with the Customer regarding the most appropriate use of such fixtures for any specific installation.
- (e) The location of fixtures for Street and Area Lighting Service shall be determined by Hydro in consultation with the Customer. After poles and fixtures have been installed they shall not be relocated except at the expense of the Customer.
- (f) Hydro does not guarantee that fixtures used for Street and Area Lighting Service will illuminate any specific area.
- (g) Where the installation of fixtures is required in a location where there are no existing distribution poles the Customer shall pay any contribution in aid of construction as may be determined under Hydro's policy for the pole line extension required to supply electric service to the location of the fixtures.
- (h) Hydro shall not be required to provide additional Street and Area Lighting Service to a Customer where on at least two occasions in the preceding twelve months, his bill for such Service has been in arrears for more than 30 days.

## **7. METERING**

- (a) Service to each building shall be metered separately except as provided in Regulation 7(b).
- (b) Service to buildings and facilities on the same Serviced Premises which are occupied by the same Customer may, subject to Regulation 7(c), be metered together provided the Customer supplies and maintains all distribution facilities beyond the point of supply.

- (c) Except as provided in Regulation 7(d) Service to each new Domestic Unit shall be metered separately.
- (d) Where an existing Domestic Unit is subdivided into two or more new Domestic Units, Service to the new Domestic Units may, in the discretion of Hydro, be metered together.
- (e) Where four or more Domestic Units are metered together, the Basic Customer Charge shall be multiplied by the number of Domestic Units.
- (f) Where the Service to a Domestic Unit has a connected load for commercial or nondomestic purposes exceeding 3000 watts, exclusive of space heating, the Service shall not qualify for the Domestic Service Rate.
- (g) Hydro shall not be required to provide more than one meter per Service, however, sub-metering by the Customer for any purpose not inconsistent with these Regulations is permitted.
- (h) Subject to Regulations 7(c) and 7(g) Service to different units of a building may, at the request of the Customer, be combined on one meter or be metered separately.
  - (i) Maximum demand for billing purposes shall be determined by demand meter or, at the option of Hydro, may be based on:
    - (i) 80% of the connected load, where the demand does not exceed 100 kW, or
    - (ii) The smallest size transformer(s) required to serve the load if it is intermittent in nature such as X-Ray, welding machines or motors that operate for periods of less than thirty minutes, or
    - (iii) The kilowatt-hour consumption divided by an appropriate number of hours use where the demand is less than 10 kW.
- (j) When charges are based on maximum demand the metering shall normally be in kVA if the applicable Rate is in kVA and in kW if the applicable Rate is in kW.

If the demand is recorded on a kVA meter but the applicable Rate is based on a kW demand, the recorded demand may be decreased by ten percent (10%) and the result shall be treated as the kW demand for billing purposes.

- (k) The Customer shall ensure that meters and related equipment are visible and readily accessible to Hydro's personnel and are suitably protected. Unless otherwise approved by Hydro, meters shall be located outdoors and shall not subsequently be enclosed.
- (l) If a meter is located indoors and Hydro employees are unable to obtain access to read the meter at the normal reading time for three consecutive months, the Customer shall upon written notice given by Hydro, provide for the installation of an outdoor meter at his expense.
- (m) In the event that a dispute arises regarding the accuracy of a meter, and Hydro is unable to resolve the matter with the Customer then either the Customer or Hydro shall have the right to request an accuracy test in accordance with the requirements of the Electricity Inspection Act of Canada. Should the test indicate that the meter accuracy is not within the allowable limits, the Customer's bill shall be adjusted in accordance with the provisions of the said Act and all costs involved in the removal and testing of the meter shall be borne by Hydro. Should the test confirm the accuracy of the meter, the costs involved shall be borne by the party requesting the test. Hydro may require a Customer to deposit with Hydro in advance of testing, an amount sufficient to cover the costs involved.
- (n) Metering shall normally be at secondary distribution voltage level but may at the option of Hydro be at the primary distribution level. When metering is at the primary distribution voltage (4–25KV) the monthly demand and energy consumption shall be reduced by 1.5%.

## **8. METER READING**

- (a) Where reasonably possible Hydro shall read meters monthly provided that Hydro may, at its discretion, read meters at some other interval and estimate the reading for the intervening month(s). Areas which consist primarily of cottages will have their meters read four times per year and Hydro will estimate the readings for all other months.
- (b) If Hydro is unable to obtain a meter reading due to circumstances beyond its reasonable control, Hydro may estimate the reading.
- (c) If due to any cause a meter has not correctly recorded energy consumption or demand, then the probable consumption or demand shall be estimated in accordance with the best data available and used to determine the relevant charge.

## 9. CHARGES

- (a) Every Customer shall pay Hydro the charges approved by the Board from time to time for the Service(s) provided to the Customer or provided to the Serviced Premises at the Customer's request.
- (b) Where a Customer requires Service for a period of less than three (3) years, the Customer shall pay Hydro a "Temporary Connection Fee". The Temporary Connection Fee is calculated as the estimated labour cost of installing and removing lines and equipment necessary for the Service plus the estimated cost of non-salvageable material. The Payment may be required in advance or subject to credit approval, billed to the Customer.
- (c) Where special facilities are required or requested by the Customer or any facility is relocated at the request of the Customer, the Customer shall pay Hydro the estimated additional cost of providing the special facilities and the estimated cost of the relocation less any betterment. The payment may be required in advance or, subject to credit approval, billed to the customer.
- (d) The Customer shall pay Hydro in advance or on such other terms approved by the Board from time to time any contribution in aid of construction as may be determined by the methods prescribed by the Board.
- (e) The Customer shall pay Hydro the amount set forth in the Rate for all poles required for Street and Area Lighting Service which are in addition to those installed by Hydro for the distribution of electricity. This charge shall not apply to Hydro poles and communications poles used jointly for Street and Area Lighting Service and communications attachments.
- (f) Where a service is Disconnected pursuant to Regulation 12(a), b(ii), (c), or (d) and the Customer subsequently requests that the service be reconnected, the Customer shall pay a reconnection fee. Where a Service is disconnected pursuant to Regulation 12(g) and an Applicant subsequently requests that the service be reconnected, the Applicant shall pay a reconnection fee. Applicants that pay the reconnection fee will not be required to pay the application fee. The reconnection fee shall be \$20.00 where the reconnection is done during Hydro's normal office hours or \$40.00 if it is done at other times.
- (g) Where a Service, other than a Street and Area Lighting Service, is Discontinued pursuant to Regulation 11(a), or Disconnected pursuant to Regulations 12(a), b(ii), (c) or (d) and the Customer subsequently requests that the Service be restored within 12 months, the Customer shall pay, in advance, the minimum monthly charges that would have been incurred over the period if the Service had not been Discontinued or Disconnected.
- (h) (i) Where a Street and Area Lighting Service is Discontinued pursuant to Regulation 11(a), (b), or (c), or 9(i), or when a Customer requests removal of existing fixtures, and/or poles, the Customer shall pay at the time of removal an amount equal to the unrecovered capital cost, plus the cost of removal less any salvage value of only the poles to be Discontinued or removed.

- (ii) If a Customer requests the subsequent replacement of the fixture, either immediately or at any time within 12 months by another, whether or not of the same type or size, the Customer shall pay, in advance, an amount equal to the unrecovered capital cost of the fixture removed, plus the cost of removal, less any non-luminaire salvage, as well as the monthly charges that would have been incurred over the period if the Service had not been Discontinued.
- (iii) Where a Street and Area Lighting Service is Discontinued, any pole dedicated solely to the Street and Area Lighting Service may, at the Customer’s request, remain in place for up to 24 months from the date of removal of the fixture, during which time the Customer shall continue to pay the prescribed monthly charge for the pole.
- (i) Where street and area lighting fixtures or lamps are wantonly, wilfully, or negligently damaged or destroyed (other than through the negligence of Hydro), Hydro, at its option and after notifying the Customer by letter, shall remove the fixtures and the monthly charges for these fixtures will cease thirty days after the date of the letter. However, if the customer contacts Hydro within thirty days of the date of the letter and agrees to pay the repair costs in advance and all future repair costs, Hydro will replace the fixture and rental charges will recommence. If any future repair costs are not paid within three months of the date invoiced, Hydro, after further notifying the Customer by letter, may remove the fixtures. In all such cases the fixtures shall not be replaced unless the Customer pays to Hydro in advance all amounts owing prior to removal plus the cost of removing the old fixtures and installing the new fixtures.
- (j) Where a Service other than Street and Area Lighting Service is not provided to the Customer for the full monthly billing period or where Street and Area Lighting Service is not provided for more than seven (7) days during the monthly billing period, the relevant charge to the Customer for the Service for that period may be prorated except where the failure to provide the Service is due to the Customer or to circumstances beyond the reasonable control of Hydro.
- (k) Where a Customer's Service is at primary distribution or transmission voltage and the Customer provides his own transformation and all other facilities beyond the designated point of supply the monthly demand charge shall, subject to the minimum monthly charge, be reduced as follows:

For the Island Interconnected, L’Anse au Loup and Isolated service areas:

- (i) For supply at 4 KV to 25 KV ..... \$0.40 per kVA
- (ii) For supply at 33 KV to 138 KV ..... \$0.90 per kVA

For the Labrador Interconnected service area:

- (iii) For supply at 4 KV to 25 KV ..... \$0.25 per kVA

- (iv) For supply at 33 KV to 138 KV ..... \$0.60 per kVA
  
- (l) Where a Customer's monthly demand has been permanently reduced because of the installation of peak load controls, power factor correction, or by rendering sufficient equipment inoperable, by any means satisfactory to Hydro, the monthly demands recorded prior to the effective date of such reduction may be adjusted when determining the Customer's demand for billing purposes thereafter. Should the Customer's demand increase above the adjusted demands in the following 12 months, the Customer will be billed for the charges that would have been incurred over the period if the demand had not been adjusted.
  
- (m) Charges may be based on estimated readings or costs where such estimates are authorized by these Regulations.
  
- (n) An application fee of \$8.00 will be charged for all requests for Customer name changes and connection of new Serviced Premises. Landlords will be exempted from the application fee for name changes at Serviced Premises for which a landlord agreement pursuant to Regulation 11(f) is in effect.

**10. BILLING**

- (a) Hydro shall bill the Customer monthly for charges for Service. However, when a Service is disconnected or a bill is revised, Hydro may issue an additional bill.
  
- (b) The charges for Street and Area Lighting Service may be included as a separate item on a bill for any other Service.
  
- (c) Bills are due and payable when issued. Payment shall be made at such place(s) as Hydro may designate from time to time. Where a bill is not paid in full by the date that a subsequent bill is issued and the amount outstanding is \$50.00 or more, Hydro will charge interest at a rate equal to the prime rate charged by chartered banks on the last day of the previous month plus five percent.
  
- (d) Where a Customer's cheque or automated payment is not honoured by their financial institution, a charge of \$16.00 may be applied to the Customer's bill.
  
- (e) Where a Customer is billed on the basis of an estimated charge, an adjustment shall be made in a subsequent bill should such estimate prove to be inaccurate.
  
- (f) Where between normal meter reading dates, one Customer assumes from another Customer the responsibility for a metered Service or a Service is Discontinued, Hydro may base the billing on an estimate of the reading as of the date of change.

- (g) Where a Customer has been under billed due to an error on the part of Hydro or due to an act or omission by a third party, the Customer may, at the discretion of Hydro, be relieved of the responsibility for all or any part of the amount of the under billing.

#### **11. DISCONTINUANCE OF SERVICE**

- (a) A Service may be discontinued by the Customer at any time upon prior notice to Hydro provided that Hydro may require 10 days prior notice in writing.
- (b) A Service may be Discontinued by Hydro upon 10 days prior notice in writing to the Customer if the Customer:
  - (i) Provided false or misleading information on the application for the Service; and
  - (ii) Fails to provide security or guarantee for the Service required under Regulation 4.
- (c) A Service may be discontinued by Hydro without notice if the Service was disconnected pursuant to Rule 12 and has remained Disconnected for over 30 consecutive days.
- (d) When Hydro accepts an application for Service, any prior contract for the same Service shall be discontinued except where an agreement for that Service is signed by a landlord under Regulation 11(f).
- (e) Where a Service has been discontinued, the Service may, at the option of Hydro and subject to Rule 12(a), remain connected.
- (f) A landlord may sign an agreement with Hydro to accept charges for Service provided to a rental premise for all periods when Hydro does not have a contract for Service with a tenant for that premise.

#### **12. DISCONNECTION OF SERVICE**

- (a) Hydro shall disconnect a Service within 10 days of receipt of a written request from the Customer.
- (b) Hydro may disconnect a Service without notice to the Customer:
  - (i) Where the Service has been discontinued.
  - (ii) On account of or to prevent fraud or abuse.
  - (iii) Where, in the opinion of Hydro, the Customer's electrical system is defective and represents a danger to life or property.
  - (iv) Where the Customer's electrical system has been modified without compliance with the Electrical Regulations.

- (v) Where the Customer has a building or structure under Hydro's wires which is within the minimum clearances recommended by the Canadian Standards Association.
- (vi) When ordered to do so by any authority having the legal right to issue such order.
- (c) Hydro may, in accordance with its Collection Policies, Disconnect a Service upon prior notice to the Customer if the Customer has a bill for any Service which is not paid in full 30 days or more after issuance.
- (d) Hydro may disconnect a Service upon 10 days prior notice to the Customer if the Customer is in violation of any provision of these Regulations.
- (e) Hydro may refuse to reconnect a Service if the Customer is in violation of any provisions of these Rules or if the Customer has a bill for any Service which is unpaid.
- (f) Hydro may disconnect a service to make repairs or alterations. Where reasonable and practical, Hydro shall give prior notice to the Customer.
- (g) Hydro may disconnect the Service to a rental premises where the landlord has an agreement with Hydro authorizing Hydro to disconnect the Service for periods when Hydro does not have a contract for Service with a tenant of that premises.

### **13. PROPERTY RIGHTS**

- (a) The Customer shall provide Hydro with space and cleared rights-of-way on private property for the line(s) and facilities required to serve the Customer.
- (b) Hydro shall have the right to install, remove or replace such of its property as it deems necessary.
- (c) The Customer shall provide Hydro with access to the Serviced Premises at all reasonable hours for purposes of reading a meter or installing, replacing, removing or testing its equipment, and measuring or checking the connected load.
- (d) All equipment and facilities provided by Hydro shall remain the property of Hydro unless otherwise agreed in writing.
- (e) The Customer shall not unreasonably interfere with Hydro's access to its property.
- (f) The Customer shall not attach wire, cables, clotheslines or any other fixtures to Hydro's poles or other property except by prior written permission of Hydro.
- (g) The Customer shall allow Hydro to trim all trees in close proximity to service lines in order to maintain such lines in a safe manner.

- (h) The Customer shall not erect any buildings or obstructions on any of Hydro's easement lands or alter the grade of such easements by more than 20 centimetres, without the prior approval of Hydro.

#### **14. HYDRO LIABILITY**

Hydro shall not be liable for any failure to supply Service for any cause beyond its reasonable control, nor shall it be liable for any loss, damage or injury caused by the use of Services or resulting from any cause beyond its reasonable control.

#### **15. GENERAL**

- (a) No employee, representative or agent of Hydro has authority to make any promise, agreement or representation, whether verbal or otherwise, which is inconsistent with these Regulations and no such promise, agreement or representation shall be binding on Hydro.
- (b) Any notice under these Regulations will be considered to have been given to the Customer on the date it is received by the Customer or three days following the date it was delivered or mailed by Hydro to the Customer's last known address, whichever is sooner.

#### **16. POLICIES FOR AUTOMATIC RATE CHANGES**

- (a) Island Interconnected System:
  - (i) As Newfoundland Power changes its rates, Hydro will automatically adjust all rates such that these customers pay the same rates as Newfoundland Power customers.
  - (ii) Rates for the Burgeo school and library will increase or decrease by the average rate of change granted to Newfoundland Power from time to time, excluding: Newfoundland Power's changes for the July 1st Municipal Tax and Rate Stabilization adjustments and any fuel rider adjustments.
- (b) L'Anse au Loup System:
  - (i) As Newfoundland Power changes its rates, Hydro will automatically adjust all rates such that these customers pay the same rates as Newfoundland Power customers.
- (c) Isolated Systems:
  - (i) Isolated Rural Domestic customers, excluding Government departments, pay the same rates as Newfoundland Power for the basic customer charge and First Block consumption (outlined in Rate 1.2D). Rates charged for consumption above this block will be automatically adjusted by the average rate of change granted Newfoundland Power from time to time.

- (ii) Rates for Isolated Rural General Service customers, excluding Government departments, will increase or decrease by the average rate of change granted Newfoundland Power from time to time.
  
- (iii) As Newfoundland Power changes its rates, Hydro will automatically adjust Rural Isolated street and area lighting rates, excluding those for Government departments, such that these rates are the same as charged Newfoundland Power customers.

**17. TEMPORARY RESTRICTION FOR LOAD ADDITIONS TO LABRADOR EAST AND LABRADOR WEST (REVISED)**

Effective September 11, 2018 and until further order of the Board of Commissioners of Public Utilities, Hydro will not provide service connections or service upgrades to an Applicant that will result in the addition of load requirements of greater than 200 kW on the Labrador East and Labrador West Systems. The load addition limit applies to Applicants for single service connection requests for load additions in excess of 200 kW and to Applicants requesting multiple service connections for which the total load addition of the multiple service requests exceeds 200 kW. The load addition limit to Applicants for multiple services will apply to both service requests made concurrently and service requests made at different times for the period while this regulation is in effect.

All Applicants for new services and for name changes on existing services shall complete a written Electrical Service Contract. Hydro will review name change requests on existing serviced premises to ensure that the additional load required to serve the new applicant does not exceed 200 kW. The review of name change requests will also include the review of multiple name change requests and/or new service connection requests from the same Applicant to ensure that the total additional load provided to an individual Applicant will not exceed 200 kW.

When Hydro has reason to believe there are special circumstances surrounding an application for service in Labrador East or Labrador West that will result in the addition of load requirements of greater than 200 kW, where it may be appropriate to approve service connections and upgrades, Hydro may apply to the Board for a variance or exemption to this Regulation.

Hydro will notify the Board of all service connection or service upgrade applications refused by Hydro during the effective period of this Regulation.

**RATE NO. 1.1**  
**DOMESTIC**

**Availability**

For Service on the Island Interconnected System and the L’Anse au Loup system to a Domestic Unit or to buildings or facilities which are on the same Serviced Premises as a Domestic Unit and used by the same Customer exclusively for domestic or household purposes, whether such buildings or facilities are included on the same meter as the Domestic Unit or metered separately.

**Rate** (Including Municipal Tax and Rate Stabilization Adjustments)

**Basic Customer Charge**

Not Exceeding 200 Amp Service ..... \$15.79 per month  
Exceeding 200 Amp Service ..... \$20.79 per month

**Energy Charge**

All kilowatt-hours..... @ 14.237 ¢ per kWh

**Minimum Monthly Charge**

Not Exceeding 200 Amp Service ..... \$15.79 per month  
Exceeding 200 Amp Service ..... \$20.79 per month

**Discount**

A discount of 1.5% of the amount of the current month's bill will be allowed if the bill is paid within 10 days after it is issued.

**General**

Details regarding conditions of service are provided in the Rules and Regulations.

**This rate does not include the Harmonized Sales tax (HST) which applies to electricity bills.**

**RATE NO. 1.1S  
DOMESTIC – OPTIONAL**

**Availability**

Available upon request for Service on the Island Interconnected System and the L’Anse au Loup system to Customers served under Rate No. 1.1 Domestic Service who have a minimum of 12 months of uninterrupted billing history at their current Serviced Premises.

**Rate**

The Energy Charges provided for in Rate 1.1 Domestic Service Rate shall apply, subject to the following adjustments:

**Winter Season Premium Adjustment** (Billing Months of December through April)

All kilowatt-hours..... @ 0.953 ¢ per kWh

**Non-Winter Season Premium Adjustment** (Billing Months of May through November)

All kilowatt-hours.....@ (1.297) ¢ per kWh

**Special Conditions**

1. An application for Service under this rate option shall constitute a binding contract between the Customer and the Company with an initial term of 12 months commencing the day after the first meter reading date following the request by the customer, and renewing automatically on the anniversary date thereof for successive 12-month terms.
2. To terminate participation on this rate option on the renewal date, the Customer must notify the Company either in advance of the renewal date or no later than 60 days after the anniversary/renewal date. When acceptable notice of termination is provided to the Company, the Customer’s billing may require an adjustment to reverse any seasonal adjustments applied to charges for consumption after the automatic renewal date.

**RATE NO. 1.3  
BURGEO SCHOOL AND LIBRARY**

**Availability**

For Service to Burgeo School and Library.

**Rate**

**Energy Charge:**

All kilowatt-hours..... @ 5.798 ¢ per kWh

**Discount**

A discount of 1.5% of the amount of the current month's bill will be allowed if the bill is paid within 10 days after it is issued.

**General**

**This rate does not include the Harmonized Sales tax (HST) which applies to electricity bills.**

**RATE NO. 2.1**  
**GENERAL SERVICE 0–100 kW (110 kVA)**

**Availability<sup>1</sup>**

For Service (excluding Domestic Service) on the Island Interconnected system and the L’Anse au Loup system where the maximum demand occurring in the 12 months ending with the current month is less than 100 kilowatts (110 kilovolt-amperes).

**Rate** (Including Municipal Tax and Rate Stabilization Adjustments)

**Basic Customer Charge**

Unmetered.....	\$11.88 per month
Single Phase .....	\$19.88 per month
Three Phase .....	\$31.88 per month

**Demand Charge**

\$9.70 per kW of billing demand in the months of December, January, February and March and \$7.20 per kW in all other months. The billing demand shall be the maximum demand registered on the meter in the current month in excess of 10 kW.

**Energy Charge**

First 3,500 kilowatt-hours.....	@ 14.098 ¢ per kWh
All excess kilowatt-hours .....	@ 11.143 ¢ per kWh

**Maximum Monthly Charge**

The Maximum Monthly Charge shall be 22.869 cents per kWh plus the Basic Customer Charge, but not less than Minimum Monthly Charge. The Maximum Monthly Charge shall not apply to Customers who avail of the Net Metering Service Option.

**Availability**

For all the Island and Labrador diesel service areas of Hydro (excluding Government Departments), available upon request for Service to Customers served under Rate 1.2 Domestic Diesel Service (First Block consumption only) who have a minimum of 12 months of uninterrupted billing history at their current Serviced Premises.

**Rate**

The Energy Charges provided for in Rate No. 1.2D Domestic Diesel Service Rate shall apply, subject to the following adjustments:

**Winter Season Premium Adjustment** (Billing Months of December through April)

**First Block Only**

All kilowatt-hours..... @ 0.953 ¢ per kWh

**Non-Winter Season Premium Adjustment** (Billing Months of May through November)

**First Block Only**

All kilowatt-hours.....@ (1.297) ¢ per kWh

**Special Conditions**

1. An application for Service under this rate option shall constitute a binding contract between the Customer and the Company with an initial term of 12 months commencing the day after the first meter reading date following the request by the customer, and renewing automatically on the anniversary date thereof for successive 12-month terms.
2. To terminate participation on this rate option on the renewal date, the Customer must notify the Company either in advance of the renewal date or no later than 60 days after the anniversary/renewal date. When acceptable notice of termination is provided to the Company, the Customer's billing may require an adjustment to reverse any seasonal adjustments applied to charges for consumption after the automatic renewal date.

**RATE NO. 5.1L**  
**NON-FIRM ENERGY**

**Availability**

For service to Customers on the Labrador Interconnected System who purchase a minimum of 1.5 MW load, who provide their own transformer and who are delivered power at transmission voltage and subject to interruption/curtailment. Hydro shall supply non-firm energy to the Customer at such times and to the extent that Hydro has electricity available in excess of the amount it requires to meet the firm service requirements of its customers. Hydro will not utilize standby generation to supply non-firm energy. Hydro may also interrupt or curtail the supply of non-firm energy at its sole discretion to deal with system constraints.

**Rate**

Basic Customer Charge ..... \$85.25 per month

**Energy Charges**

***On-Peak Energy Rate:***

The non-firm energy charge for the on-peak period for the calendar month shall be calculated monthly based on the weighted average of:

- (i) the settlement price for NYISO Zone A Day-Ahead Peak Calendar-Month 5 MW Futures after the end of trading on the nineteenth day of the previous month, converted to Canadian dollars using the exchange rate of the same day, and adjusted for losses and other market fees; and
- (ii) the settlement price for ISO New England Mass Hub 5 MW Peak Calendar-Month Day-Ahead LMP Futures after the end of trading on the nineteenth day of the previous month, converted to Canadian dollars using the exchange rate of the same day, and adjusted for losses and other market fees.

***Off-Peak Energy Rate***

The non-firm energy charge for the off-peak period for the calendar month shall be calculated monthly based on the weighted average of:

- (iii) the settlement price for NYISO Zone A Day-Ahead Off-Peak Calendar-Month 5 MW Futures after the end of trading on the nineteenth day of the previous month, converted to Canadian dollars using the exchange rate of the same day, and adjusted for losses and other market fees; and
- (iv) the settlement price for ISO New England Mass Hub Day-Ahead Off-Peak Calendar-Month 5 MW Futures after the end of trading on the nineteenth day of the previous month, converted to Canadian dollars using the exchange rate of the same day, and adjusted for losses and other market fees.

The weightings applied to each market price to calculate the on-peak and off peak energy charges will reflect the percentage of kWh exports sold (i.e., including exports from regulated and non-regulated Hydro) based on each market for the previous calendar month.

### **Peak and Off-Peak Periods**

The winter on-peak period is 7 am to 10 pm, Monday to Friday, for the months of December to March and the non-winter peak period is 8 am to 10 pm, Monday to Friday, for the period April to November. The off-peak period will include all other hours.

### **Terms and Conditions**

1. The product is non-firm energy, meaning delivery or receipt of the energy may be interrupted at any time to deal with system constraints. Standby generation will not be used to ensure continuity of service to non-firm customers.
2. The Customer will be required to interconnect at transmission system voltages of 46 kV or higher.
3. Applicants interested in proceeding with non-firm service will fund a system impact study for use in finalizing the amount of non-firm capacity that can be made available.
4. The Customer is required to fund the cost of interconnection in advance of Hydro providing service.
5. The Customer curtailment process must be automated and controllable by operators in Hydro's Energy Control Centre ("ECC"). Operational procedures and protocols must be established to ensure that interruption of non-firm customers can be safely and effectively performed by ECC operators.
6. The Customer must be capable of curtailing load within ten minutes of being advised by Hydro. In the case where the Customer does not comply with a curtailment request, Hydro can automatically interrupt supply to the Customer.
7. Any equipment, software, and resources required to remotely monitor and enable automatic curtailment at both Hydro's facilities and the Customer's facilities will be funded by the Customer.
8. The Customer will be required to provide reasonable security prior to Hydro connecting service, usually in the form of two months equivalent bills. The security deposit will be returned when the Customer has established two consecutive years of good credit history with Hydro.
9. Hydro will inform the Customer of the Non-firm energy charge on the first business day following the 21<sup>st</sup> day of the month preceding the month for which the rate is being set.
10. The Customer must supply and own the transformer supplying the customer.

11. Customer-owned equipment required for interconnection must meet Hydro's service standards.
12. The rate is designed for customers supplied and metered at the high side of the transformer at transmission voltage of 46 kV or higher. For customers metered at the low side of the transformer, meter readings shall be increased by 1.5% for each transformation between the meter and the transmission voltage.
13. Hydro reserves the right to have a separate service agreement with the Customer to provide clarity on issues that may not be specifically set out in the Terms and Conditions.
14. If the Customer's power factor is below 90%, the Customer shall upon written notice by Hydro provide, at the Customer's expense, power factor corrective equipment to ensure that a power factor of not less than 90% is maintained.
15. For the purpose of allocation and monitoring the use of non-firm capacity, Hydro will maintain separate regions for Labrador East and Labrador West.
16. If a non-firm customer discontinues service, the remaining existing non-firm customers in the same region will be provided the option to share equally in the newly available non-firm capacity. If at the conclusion of this process, non-firm capacity remains available in the region, Hydro can offer the available non-firm capacity available to new applicants.
17. When Hydro determines that the full non-firm capacity is utilized in a region, Hydro will not add additional non-firm customers unless additional transmission investments result in additional non-firm capacity becoming available in that region. In this circumstance, Hydro will conduct an open process prior to allocation of additional non-firm capacity among applicants. Existing non-firm customers would have the opportunity to apply to increase their non-firm capacity allocation as part of this process.

**This rate schedule does not include the Harmonized Sales Tax (HST) which applies to electricity bills.**

## **LABRADOR INDUSTRIAL**

### **Availability**

A Labrador Industrial Customer is any person or entity purchasing power, other than a retailer, supplied from the Labrador Interconnected bulk transmission grid at voltages of 66 kV or greater on the primary side of any transformation equipment directly supplying the person and has entered into a contract with Hydro for the purchase of power and energy.

These rates will apply to power sold by Hydro to Labrador Industrial Customers served from the Labrador Interconnected Grid.

### **Monthly Rate**

#### **Transmission Demand Charge** (Closed Rate – Available To Existing Customers Only)

The rate for Firm Power, as defined in the Industrial Service Agreement, shall be \$1.08 per month per kilowatt of Billing Demand.

#### **Specifically Assigned Transmission Charges**

This rate may include specifically assigned charges upon approval by the Board.

Rates for transmission service are subject to approval of the Board.

#### **Generation Demand Charge**

The rate for Firm Power, as defined and set out in the Industrial Service Agreement, shall be \$0.41 per month per kilowatt of Billing Demand.

The generation demand charge shall be based upon the most recent test year cost of service approved for the establishment of customer rates by the Board.

### **Billing Demand**

The billing demand shall be equal to the greater of (i) the customer's Power on Order; (ii) the actual monthly demand in the current month; or (iii) their maximum demand in the calendar year less their interruptible demand.

## **Firm Energy Charge**

The Firm Energy rate shall be applied to the quantity of energy in the billing month that is less than or equal to the forecast of energy consumption that was provided by the Labrador Industrial Customer no later than the nineteenth day of the previous month.

The Firm Energy Rate shall be calculated monthly based on the following formula:

$$\text{Firm Energy Rate, } R_{\text{FIRM}} = \{ (E_D \times R_D) + (E_M \times R_M) \} / E_{\text{TOTAL}}$$

Where:

$E_{\text{TOTAL}}$  is the Total Labrador Industrial Energy Forecast, expressed in MWh, for the billing month as provided by the Labrador Industrial Customers no later than the nineteenth day of the previous month;

$E_D$  is the lesser of the maximum quantity of the Development Energy Block, adjusted for losses and expressed in MWh, for the billing month as defined in Schedule A or  $E_{\text{TOTAL}}$ ;

$E_M$  is the quantity of Market Block Energy, expressed in MWh, for the billing month and is calculated as:

$$E_M = E_{\text{TOTAL}} - E_D, \text{ when } E_{\text{TOTAL}} > E_D; \text{ otherwise}$$

$$E_M = 0$$

$R_D$  is the Development Block Energy Rate which, effective January 1, 2025 through December 31, 2024, is \$28.56/MWh. The Development Block Energy Rate will be adjusted annually according to the percentage change over 12 months in the All-items Consumer Price Index for Canada; and

$R_M$  is the Market Block Energy Rate which shall be calculated annually based on the settlement price for New York Independent System Operator ("NYISO") Zone A Peak and Off-Peak electricity after the end of trading on the nineteenth day of November of the previous calendar year, converted to Canadian dollars using the exchange rate of the same day, adjusted for losses and other market fees. Effective January 1, 2025 through December 31, 2025, the Market Block Energy Rate is \$55.26/MWh.

## **Imbalance Energy Charge**

The Imbalance Energy Charge shall be applied to all energy in the billing month that is in excess of the forecast of energy consumption that was provided by the Labrador Industrial Customer no later than the nineteenth day of the previous month.

The Imbalance Energy Charge shall be calculated monthly based on a blend of the settlement price for NYISO Zone A Peak and Off-Peak electricity after the end of trading on the nineteenth day of the previous month, converted to Canadian dollars using the exchange rate of the same day, and adjusted for losses and other market fees.

### **Adjustment for Losses**

If the metering point is on the load side of the transformer, either owned by the customer or specifically assigned to the customer, an adjustment for losses shall be applied as determined in consultation with the customer.

### **General**

Details regarding the conditions of service are outlined in the Industrial Service Agreements.

**This rate schedule does not include the Harmonized Sales Tax (“HST”) that applies to electricity bills.**

**SCHEDULE A**

The Development Energy Block for each month is specified as follows:

<b>Month</b>	<b>Development Energy Block (MWh)</b>
January	166,791
February	151,995
March	166,791
April	161,411
May	166,791
June	161,411
July	166,791
August	166,791
September	161,411
October	166,791
November	161,411
December	166,791

## COMMISSIONING POWER NON-FIRM RATE

### Availability

Any person purchasing power for the purpose of commissioning electrical transmission assets, supplied from the Interconnected Island bulk transmission grid at voltages of 66 kV or greater on the primary side of any transformation equipment directly supplying the person.

### Rate

#### **Non-Firm Energy Charge** (¢ per kWh)

Non-Firm Energy is deemed to be supplied from thermal sources. The following formula shall apply to calculate the Non-Firm Energy rate:

$$\{(A \div B) \times (1 + C) \times (1 \div (1 - D))\} \times 100$$

- A = the monthly average cost of fuel per barrel for the energy source in the current month or, in the month the source was last used
- B = the conversion factor for the source used (kWh/bbl)
- C = the administrative and variable operating and maintenance charge (10%)
- D = the average system losses on the Island Interconnected grid for the last five years ending in 2016 (3.34%).

The energy sources and associated conversion factors are:

1. Holyrood, using No. 6 fuel with a conversion factor of 583 kWh/bbl
2. Gas turbines using No. 2 fuel with a conversion factor of 475 kWh/bbl
3. Diesels using No. 2 fuel with a conversion factor of 556 kWh/bbl

### Adjustment for Losses

If the metering point is on the load side of the transformer, either owned by the customer or specifically assigned to the customer, an adjustment for losses as determined in consultation with the customer shall be applied.

### General

Delivery of power and energy under this rate is subject to Hydro's ability to supply, and maybe reduced or interrupted at the discretion of Hydro.

**This rate schedule does not include the Harmonized Sales Tax (HST) that applies to electricity bills.**

## **NET METERING SERVICE OPTION**

### **I. Availability**

- 1) For Customers who use generation on their Serviced Premises to offset part or all of the electrical energy requirements of the Serviced premises. Energy generated in excess of the requirements of the Serviced Premises is permitted to be credited against the Customer's energy purchases from Hydro in accordance with this rate option.
- 2) Net Metering Service Option is available for any Serviced Premises that is supplied from Hydro's distribution system, is billed under one of Hydro's metered service rates, and that has generation electrically connected to it that meets the requirements of these provisions. Net Metering Service is not available for un-metered service accounts.
- 3) In order to avail of the Net Metering Service Option, Customers must submit a completed Net Metering Service Application to Hydro demonstrating the Customer's eligibility for Net Metering Service.
- 4) Availability of the Net Metering Service Option will be closed once the provincial aggregate generating capacity for Net Metering Service of 5.0 MW has been met.
- 5) Customers that avail of the Net Metering Service Option must maintain compliance with all requirements of this Option. Hydro shall have the right to verify compliance through inspection or testing.

### **II. Metering**

- 1) Net Metering Service will ordinarily be metered using a Company-supplied single meter capable of registering the flow of electrical energy in two directions. The meter will separately capture both the energy supplied to the Customer by Hydro and the energy supplied to Hydro by the Customer.
- 2) At Hydro's option, the output of the Customer's generation may be metered separately. In that case, the Customer shall provide Hydro with the access necessary to install and maintain the required metering equipment.
- 3) The Customer shall pay all costs to upgrade the metering equipment for Net Metering Service if the existing electrical meter at the Serviced premises is not capable of safely and reliably measuring both the energy supplied to the Customer by Hydro and the energy supplied to Hydro by the Customer.

### **III. Billing**

- 1) Each account availing of Net Metering Service will be billed on the rate normally applicable to the Customer's class of Service.
- 2) The Customer's net monthly bill will be determined by deducting the Customer Generation Credit from the total of all charges for Service. The Customer Generation Credit equals the Generation Energy Credit, in kilowatt-hours ("kWh") multiplied by the rate applicable to the Customer's class of Service during the billing month.
- 3) The "Generation Energy Credit" is the sum of the kWh energy supplied by the Customer to Hydro during the billing month plus Banked Energy Credits. The Generation Energy Credit for a billing month shall not exceed the energy supplied by Hydro to the Customer during that month.
- 4) "Banked Energy Credits" are the amount of kWh energy supplied by the Customer to Hydro that exceeds the kWh energy supplied by Hydro to the Customer. Banked Energy Credits in excess of those used to calculate the Generation Energy Credit for a billing month will be carried forward to the following month.
- 5) Settlement of Banked Energy Credits will be computed based upon the Company's marginal wholesale rate that applies to sales to Newfoundland Power for Island Interconnected customers, the imbalance rate for Labrador Interconnected customers and the excess energy rate for diesel customers, during the calendar month in which billing occurs.
- 6) Whenever a Customer's participation in the Net Metering Service Option is discontinued, any unused Banked Energy Credits will be settled with a credit on the Customer's next bill.
- 7) All customers must pay Harmonized Sales Tax (HST) on the energy supplied by Hydro to the Customer during the billing month. If a Customer availing of the Net Metering Service Option is required by law to collect HST on the energy they supply to Hydro, Hydro will pay HST to the Customer based on the amount of the Customer Generation Credit. It is the Customer's responsibility to notify Hydro in writing if they are required to collect HST on the energy they supply to Hydro.

**Special Conditions**

- 1) Special conditions in this clause do not supersede, modify or nullify the conditions accompanying the metered rate schedules applicable to the Customer's class of Service.
- 2) To avail of Net Metering Service, a single Customer must own and maintain responsibility for the Serviced Premises, the generation and the electrical facilities connecting it to Hydro's distribution system.
- 3) To qualify for Net Metering Service, the Customer's generation must meet the following requirements:
  - i) Be designed not to exceed the annual energy requirements of the buildings and facilities metered together on the Serviced Premises;
  - ii) Have a manufacturer's nameplate capacity rating totalling not more than 100 kW, except where a lower rating is stipulated by Hydro for technical reasons;
  - iii) Be electrically connected through Customer-owned electrical facilities to the Serviced Premises to which Net Metering Service is being provided;
  - iv) Produce electrical energy from a renewable energy source, including wind, solar, photovoltaic, geothermal, tidal, wave, biomass energy or other renewable energy sources that may be approved by Hydro on a case-by-case basis; and
  - v) Meet all applicable safety and performance standards established by the Canadian Electrical Code, the Public Safety Act and Hydro's Interconnection Requirements.
- 4) All Customer-owned wiring, equipment and devices associated with generation utilized for Net Metering Service shall conform to Hydro's interconnection requirements.
- 5) The Customer will retain the rights to any renewable energy credits or greenhouse gas-related credits arising from the use of renewable energy sources to generate electricity in accordance with this Option.
- 6) A Customer availing of Net Metering Service is responsible for all costs associated with their own facilities. The Customer shall also be required to pay all costs incurred by Hydro to modify the utility supply for the provision of Net Metering Service, and for necessary engineering or technical studies required in connection with the provision of Net Metering Service to the Customer.
- 7) The approval of an application for Net Metering Service will be subject to the applicant entering into a Net Metering Interconnection Agreement with Hydro.

- 8)** If an applicant approved for Net Metering Service does not proceed with operation of its generation in accordance with its approval within two years from the date of Hydro's approval of the application, the approval will be rescinded.
- 9)** Approval of Net Metering Service may be revoked if a Customer is found to be in violation of provisions of Hydro's Rules and Regulations.
- 10)** If participation in the Net Metering Service Option is discontinued, the Customer must re-apply to Hydro to avail of the Net Metering Service Option.
