**9. FINANCIAL INSTRUMENTS**

**Fair Value**

The estimated fair values of financial instruments as at March 31, 2026 and December 31, 2025 are based on relevant market prices and information available at the time. Fair value estimates are based on valuation techniques which are significantly affected by the assumptions used including the amount and timing of future cash flows and discount rates reflecting various degrees of risk. As such, the fair value estimates disclosed are not necessarily indicative of the amounts that LIL Holdco (2021) might receive or incur in actual market transactions.

As a significant number of LIL Holdco (2021)'s assets and liabilities do not meet the definition of a financial instrument, the fair value estimates disclosed do not reflect the fair value of LIL Holdco (2021) as a whole.

Establishing Fair Value

Financial instruments recorded at fair value are classified using a fair value hierarchy that reflects the nature of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1 - valuation based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 - valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - valuation techniques using inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The fair value hierarchy requires the use of observable market inputs whenever such inputs exist. A financial instrument is classified to the lowest level of the hierarchy for which a significant input has been considered in measuring fair value. For assets and liabilities that are recognized at fair value on a recurring basis, LIL Holdco (2021) determines whether transfers have occurred between levels in the hierarchy by reassessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. There were no transfers between Level 1, 2 and 3 fair value measurements during the period ended March 31, 2026 and the year ended December 31, 2025.

	<b>Level</b>	<b>Carrying</b>	<b>Fair</b>	<b>Carrying</b>	<b>Fair</b>

**LABRADOR - ISLAND LINK HOLDING (2021) CORPORATION**  
**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS (Unaudited)**

---

The fair values of cash, restricted cash, trade and other receivables, related party receivable and trade and other payables approximate their carrying values due to their short-term maturity.

The fair values of Level 2 financial instruments are determined using quoted prices in active markets, which in some cases are adjusted for factors specific to the asset or liability. Level 2 fair values of other risk management assets and liabilities and long-term debt are determined using observable inputs other than unadjusted quoted prices, such as interest rate yield curves.

The Class B limited partnership units are carried at amortized cost, calculated using the effective interest method, which approximates fair value. The effective interest rate as at March 31, 2026 is 8.9% (December 31, 2025 - 8.9%) which is the rate that discounts the estimated future cash flows to the amortized cost of the financial liabilities. Due to the unobservable nature of the effective interest rate and resulting discounted cash flows associated with the units, the instruments have been classified as Level 3.

The table below sets forth a summary of changes in fair value of LIL Holdco (2021)'s Level 3 financial liabilities given a one percent change in the discount rate while holding other variables constant:

<i>(millions of Canadian dollars)</i>	1% increase in discount rate	1% decrease in discount rate
Class B limited partnership units	(80)	77
